

## Butterfly Effect

Find something sublime  
making you fly so high  
try to get it right  
Lie 'cause you didn't succeed  
and because you don't need  
no one to know  
Cry when it all hits the surface  
she told him he told her  
face the domino row  
One by one they amount to tons

Now you lie underneath  
you can't move your feet  
you can barely breathe  
and it's crushing your guts  
making you shrink to dots  
forming a wet spot  
and you think it's unfair  
but the stones don't care  
no the stones don't care  
and the answer to why  
is a butterfly  
can make tornados hit the sky

tornados hit the sky  
why tornados hit the sky

you wake up it's dark and sweat  
is all over you and your bed  
it was just a nightmare  
but it got you pretty scared  
oh yeah  
now you plan to stay aware  
of anyone that knows and dares  
to share you would cut off his hair  
like anytime and anywhere

like it would make something undone  
all you can do is shut and take it

take it

and when it's over be advised

you can't kill all the butterflies  
and when it's over be prepared  
to meet the stones again somewhere  
and take it again
